

Carbon Impregnated Synthetic Media

General Information

Carbon impregnated non-woven polyester fibre filter mats provide a highly resilient and easy to cut filter media that can be trimmed to size using normal hand tools.

These materials offer the advantages of activated carbon without the handling product associated with loose powders. Media colour is Black.

Applications

This media is suitable for many applications including:-

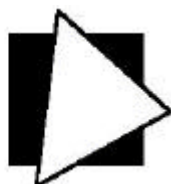

Solder fume removal, ozone removal in offices, tobacco smoke and odour removal in domestic & industrial applications and waste water treatment.

Technical Information

Product Ref	Nominal Loft (mm)	ProductWeight (g/m ²)	Carbon Weight (g/m ²)	Carbon Weight (%)	CTC Adsorption (%) Internal	CTC Adsorption (Kg/m ³) Internal	Roll Size (mm)
